Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The present application meets the requirements of Article 33(2) and (3) PCT, because the subject-matter of claims 1-6 is novel and involves an inventive step.

Closest prior art: Document D1=EP-A-0985628 discloses a safety top balustrade for elevator with a fixed structure comprising a plurality of vertical uprights fixed near the edge of the car roof and horizontal tubular guard rails fixed at the uprights. A passage is formed to the elevator controller when a bar is folded down (fig.5).

Difference: A mobile structure with horizontal telescopic bars which are telescopically mounted inside the tubular guard rails are defined in the invention to open a passage to the elevator controller.

Objective problem: How to ameliorate the structure to define an opening to the elevator controller.

Solution: The concept of the invention lies in the telescopic bars, which enter completely into the horizontal guard rails, thereby offering a free passage to the elevator operator.

NOTE: "A controller (14)" has to be defined in line 2 claim 1.
